

Errata for TCP/IP Sockets in C: Practical Guide for Programmers, Second Edition

Page 5: The following sentence should read

An IPv4 mapped address is formed by prefixing the four bytes in the IPv4 address with ::ffff.

Note the prefix should be 4 (not 3) fs.

Page 24: The struct `in_addr` in Section 2.4.3 should be

```
struct in6_addr {  
    uint8_t s6_addr[16];  
}
```

Page 47: On lines 20, 21, and 26 of `SetupTCPServerSocket()` in `TCPServerUtility.c`, replace `servAddr` with `addr` (in the `socket()` and `bind()` function calls).
